

May 12, 2009

To Whom it May Concern,

A Compliance Assessment has revealed that Vibrance Technology Corporation has implemented a combination of technical, administrative and physical safeguards that are consistent with the requirements of MGL Ch 93H and is therefore capable of withstanding the risks, vulnerabilities and threats that are inherent with maintaining personal information.

Further, Mr. Richard Eichacker, President, demonstrated a comprehensive awareness of the critical elements of data security and recognition of the need for ongoing data governance. Mr. Eichacker is aware of all systems, devices, media and storage areas wherein personal information is maintained and is committed to safeguarding the client data that Vibrance accesses, transports and stores.

Upon analyzing the company's control environment, conducting interviews of Mr. Eichacker, examining written responses, evaluating related documentation and conducting requisite verification, I have determined that Vibrance Technology Corporation meets the specified security requirements set forth with MGL Ch 93H.

Sincerely,

A handwritten signature in black ink, appearing to read "John Moynihan".

John Moynihan, CGEIT
President
